AMENDMENT

Sir:

Responsive to the Office Action mailed April 3, 1996,
in the above-identified application, please amend the application
as follows.

In the Claims

1. (three times amended) An analog of a protein
regulating complement activation having short consensus repeats
of amino acid sequence selected from the group [of complement
regulating proteins consisting] of complement receptor 1,
complement receptor 2, decay accelerating factor, membrane
cofactor protein, C4 binding protein, and factor H, and those
complement regulating proteins wherein the carboxy terminus is
removed to allow the protein to be secreted, wherein said protein
analog is selected from the group consisting of complement
regulating protein analogs containing short consensus repeats
derived from a second, different complement regulating protein,
